

## Covid-19 TFL and HPL Cleaning Guide

To help protect our customers and product recipients from the Covid-19 virus, please follow the DeskMakers cleaning guide for TFL and HPL surfaces below:

The use of a disinfectant containing either Quaternary Ammonium, Ethanol, Isopropanol, or Hydrogen Peroxide as active ingredients is recommended.

**Products such as, but not limited to:**

- Lysol® All-Purpose Cleaner
- Virex® II 256
- Purell®
- Virox™
- Fantastic
- Windex
- Alcohol or synthetic thinner
- Anti-bacterial dish soap
- Glass Plus
- Mr. Clean
- Formula 409
- Isopropyl Alcohol
- Pine-Sol (original formula)

When cleaning with any of the solutions mentioned above, do not allow the solution to sit for an extended period of time on the surface and wipe thoroughly within a few moments of application.

Do not use Sodium Hypochlorite-based (bleach) or any disinfectant that contains chloride in any form on TFL or HPL.
