External Safety Sensor

An External Safety Sensor is able to detect even the smallest deformation. When a collision or restriction of movement is detected, the External Safety Sensor triggers the motors to move in the opposite direction to release the pinched obstacle. The External Safety Sensor can be added to the Hover Lift bases after installation. AC-DRBK-OMT for \$319.

All Hover electric height adjustable bases are equipped with Intelligent System Protection (ISP). ISP is used to protect base motors, control boxes and internal components from damage resulting from collision or restriction of movement. The ISP is not intended for protection of the end user, and is less sensitive than the External Safety Sensor.

Hover Storage Options

See Casegoods pricebook for desk height pedestal pricing.

Desk Height Pedestals

Desk height pedestals and credenzas can be placed beside Hover height adjustable tables for addition worksurface space and personal storage. A minimum clearance of 1" should be maintained between worksurface edges and storage units to minimize possible pinch point hazards. Only pedestals with a finished back and top should be specified if the units are not going be placed in front of an Extension Wall Panel.

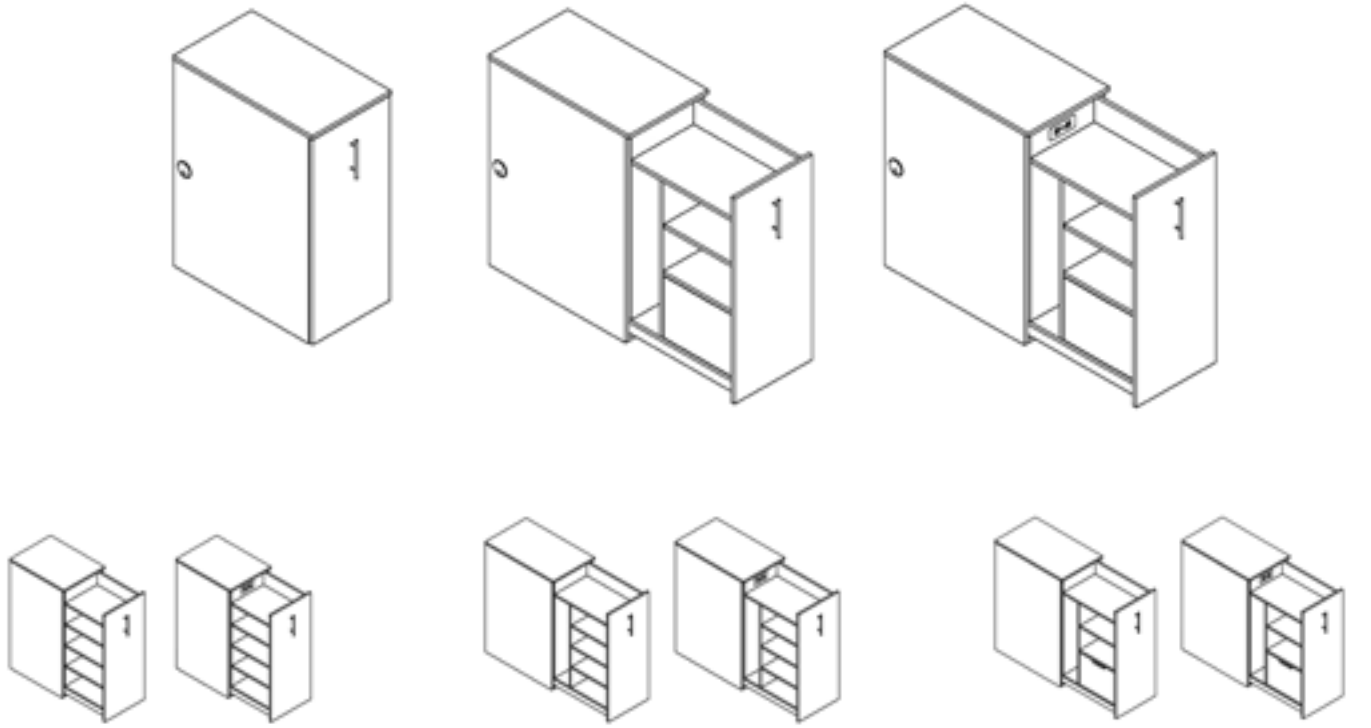

Clearances with Hover Tables and Storage

When storage is to be place under height adjustable tables, storage heights should not be taller than the base minimum height to make sure the storage will not interfere with the height adjustable base operation.

Hover Personal Storage Tower

Personal Storage Tower units can be used to create space division between each user while providing personal storage. Personal storage tower is available in left and right models. Right models are shown.

26" Shelf Storage Model

Grommet for Personal Storage Tower

If tower units are placed between trough units, grommets are required to route wiring through the back of the tower cabinet. Grommet placement aligns with trough openings.

HV-GROM-LEFT

One grommet located on left side of tower.

HV-GROM-BOTH

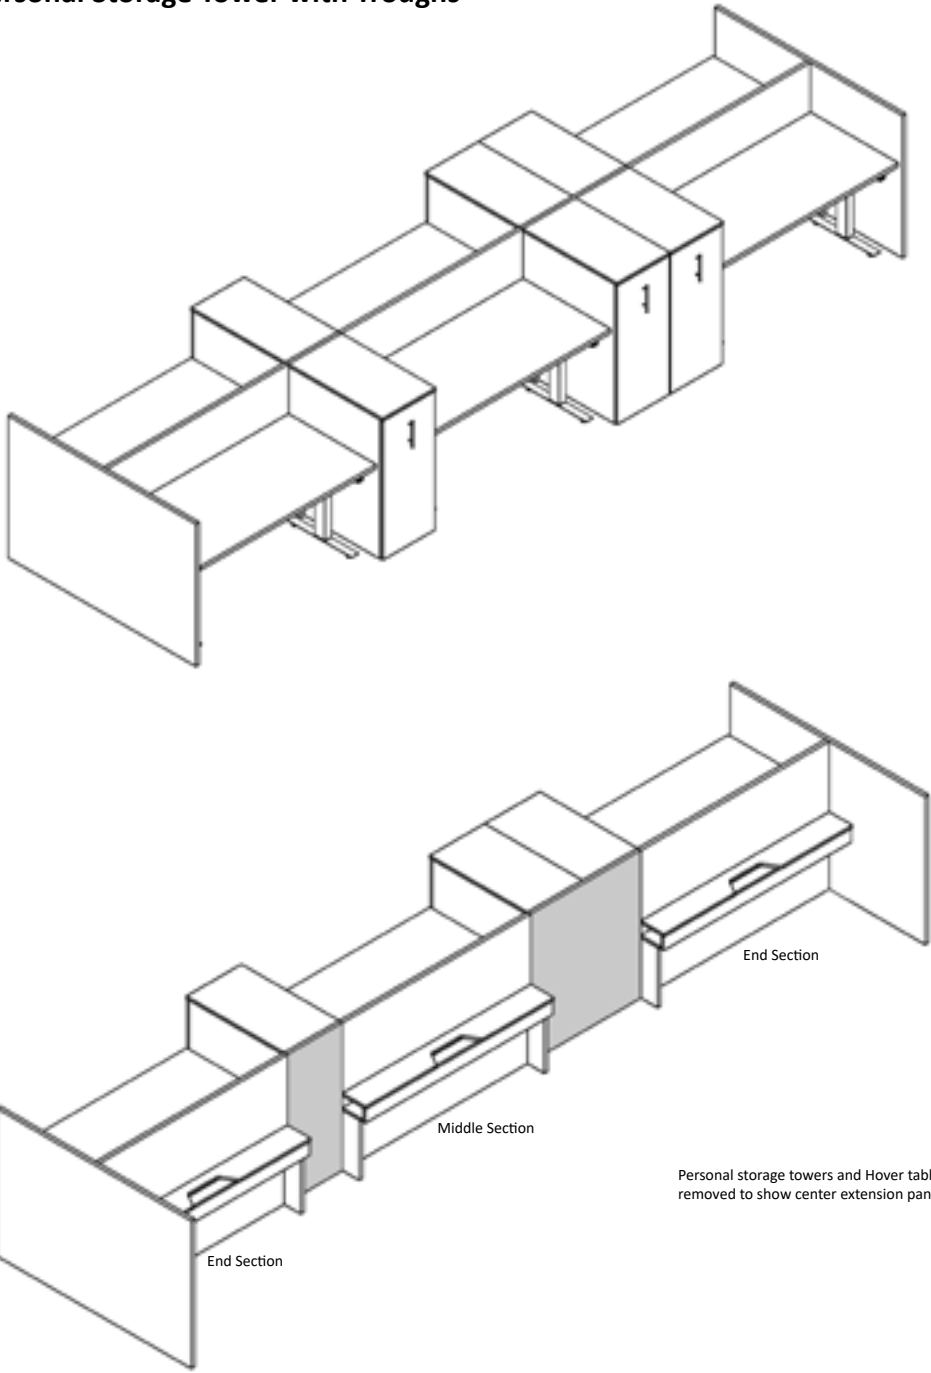

One grommet located on both left and right side of tower.

HV-GROM-RGHT

One grommet located on right side of tower.

Using Hover Personal Storage Tower with Troughs

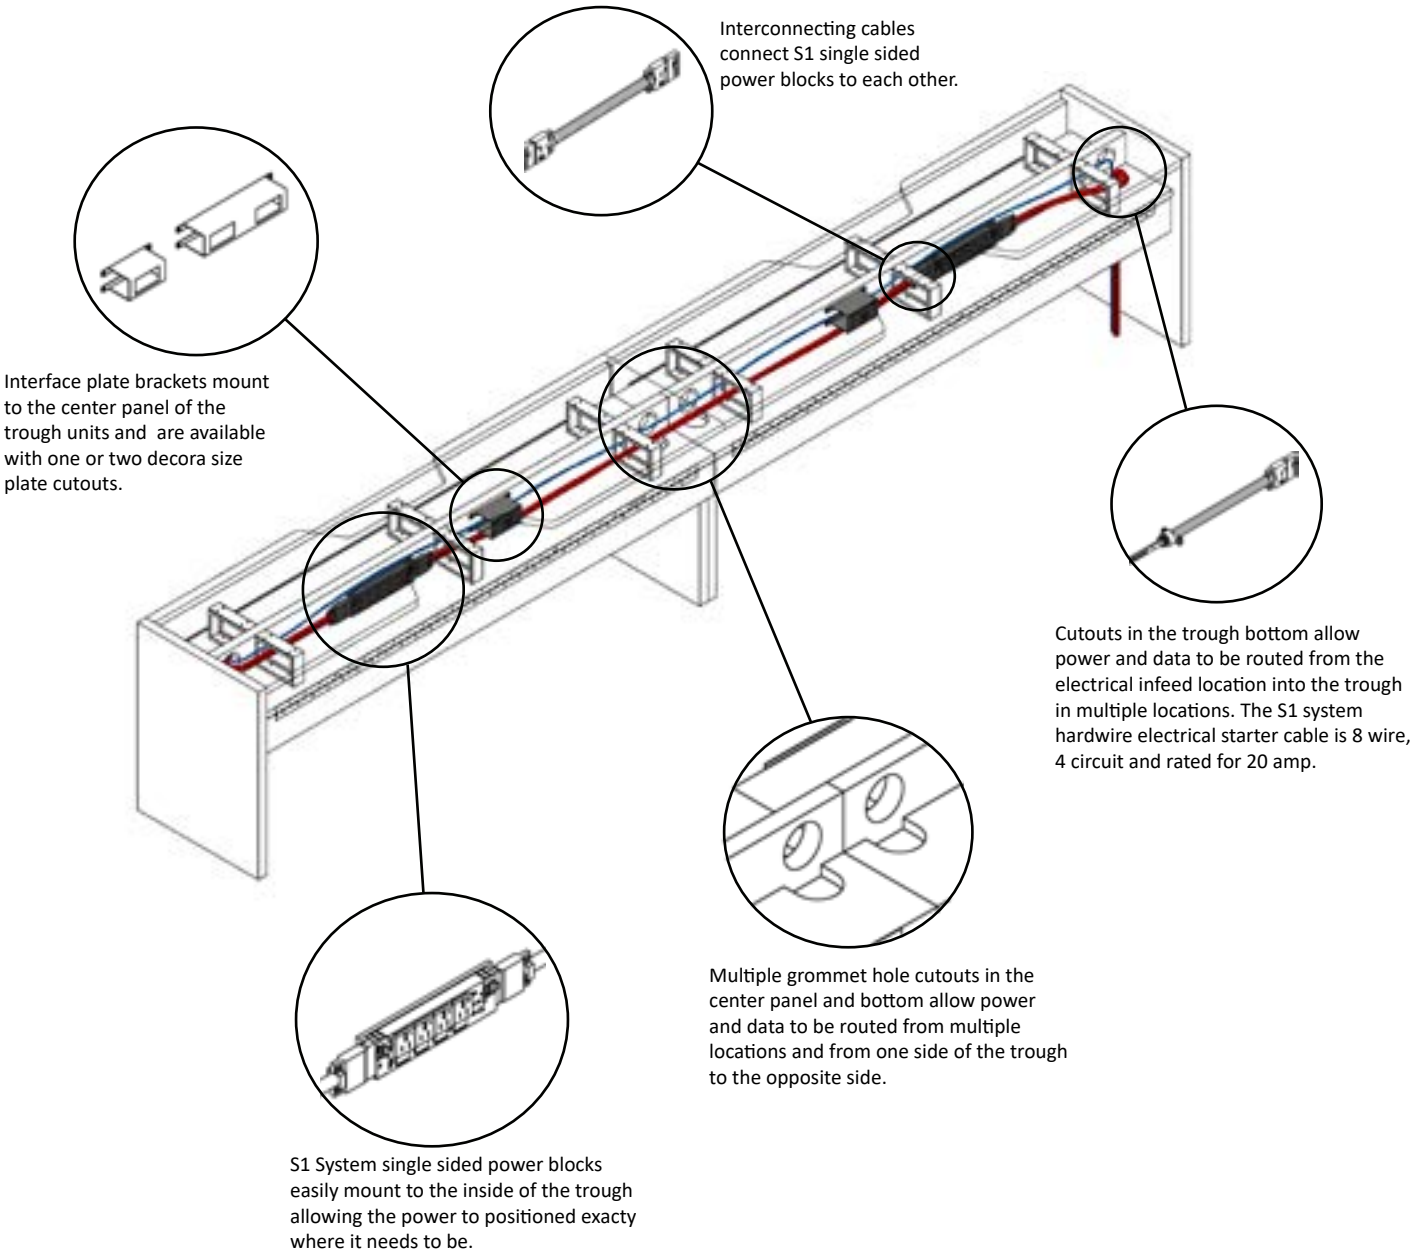

Center Extension Wall Panels

- Panels are 1-1/8" thick material and include mechanical biscuit fasteners on both ends.
- Panels are available in lengths 18"-48" in 6" increments to allow one or two storage units to be placed in front of center extension panel.
- Panels must attach to a trough center panel and storage unit. Cannot be used as a stand-alone wall.
- Grain runs horizontal.
- Grommets for routing wiring through the back section of storage towers must be specified.

Hover Electrical

Hover Troughs allow for the horizontal routing of power, voice, data and IT/AV wiring from infeed source to each individual work station.

Hover Worksurface Grommet Location

Rectangle worksurface grommet location is limited to the center (C1) location due to the worksurface supports attached to each lifting column on the height adjustable bases.

Hover Wire Management to Worksurfaces

Vertical cable managers flex to allow wiring to be concealed and organized while moving with the worksurface as it raises and lowers to prevent binding.

Cable Spine for Freestanding Tables

Used for height adjustable tables when not used with Hover Troughs. Conceals and carries wires to weighted base at floor.

Cable Carrier for Trough Tables

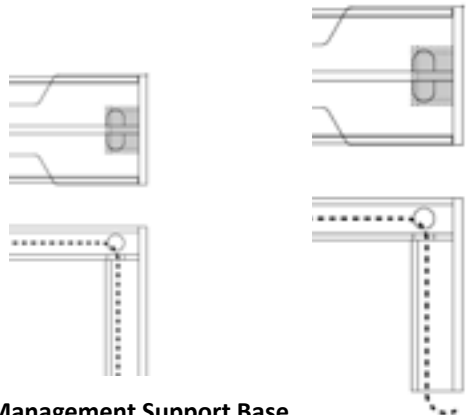

Used for height adjustable tables when used with Hover Troughs. Conceals and carries wires from trough to the underside of the worksurface. Cables simply push into carrier for quick and easy set up.

Hover Electrical Infeed Options

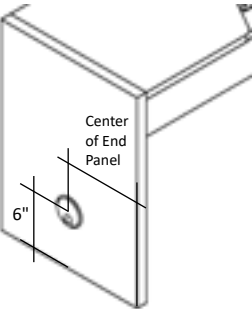

U-Shaped Wire Management Channel

Used to conceal power and data cables routing from infeed locations into trough. Attaches to end panel with magnetic catches and does not provide support. U-Shaped Wire Management Channel is 7"w x 5"d x 18"h.

End Panel Infeed Grommet

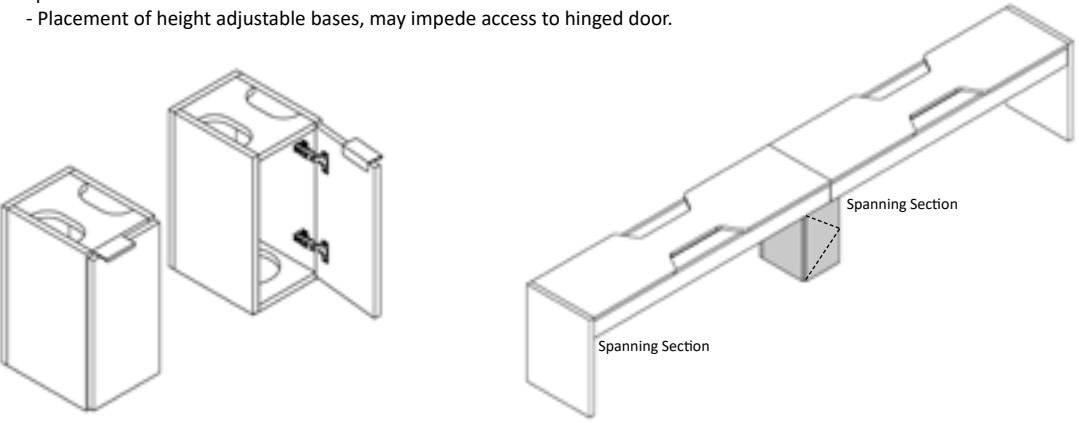

Used when infeed location is not located underneath the trough. Allows cables to route from outside the trough structure through the end panel. Grommet is 2-1/2" diameter. If special placement is required, please provide drawing of location.

Wire Management Support Base

Used on Platform and Raised Panel trough units. The Wire Management Support Base replaces the intermediate leg supports on the trough units. Intended to be placed on top of floor core infeeds. Hinged door allows easy access for installation and future modifications. Includes 6" diameter cutout in bottom and dual cutouts in top to route wires into trough.

- Note:
- Wire management support base is 9"w x 12"d x 18"h. Please check height adjustable base sizes to make sure they do not interfere with base placement.
 - Placement of height adjustable bases, may impede access to hinged door.
