Understanding Synapse Electric

Interconnecting cables connect power blocks to each other.

Surface mounted power units provide power access above the worksurface and conceal cables by plugging into the Power block below the surface.

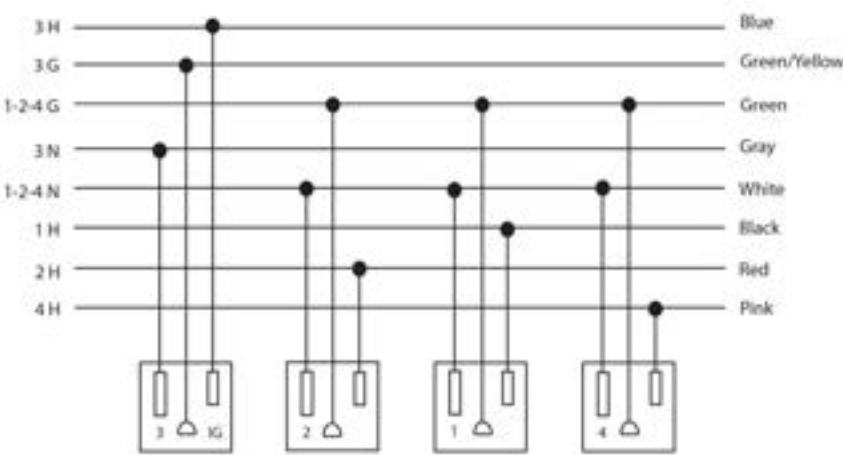

Power enters the bench through the hardwire electrical starter cable. Starter cable is 8 wire, 4 circuit and rated for 20 amp.

Double sided power blocks attach to the underside of the Center Beam. Power blocks have 4 outlet positions on both the front and back face. Outlets are interchangeable permitting any required circuit combination.
